

**PLASTIC SELECTION GROUP, INC.**  
YOUR PARTNER IN DEVELOPING MATERIAL ALTERNATIVES

---

To whom it may concern:

FDA Direct Food Contact compliance for a manufactured plastic article depends on three things:

1. Chemical formulation/composition of the material used in the article
2. Specific application that the article is being used.
3. Conditions of its intended use.

Plastic Selection Group in reference to KOSTRATE® EDGE resins is prepared to address item one of the compliance list since it refers to the resin formulation/composition. Items two and three are more dependent upon the article's application end use and are controlled by the end use customer.

Plastic Selection Group confirms that the composition of KOSTRATE® EDGE resins meet direct food contact guidelines as described in CFR 21 177.1030, CFR 21 177.1640, and CFR 21 177.1830. Below are the FDA internet website references for validation.

<http://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfcfr/CFRSearch.cfm?fr=177.1030>

<http://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfcfr/CFRSearch.cfm?fr=177.1640>

<http://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfcfr/CFRSearch.cfm?fr=177.1830>

Hopefully the above references will address concerns or answer any questions you have regarding the use of KOSTRATE® EDGE resins in direct food contact applications.

Sincerely,

Frank William Dickinson
